

CRAFTY CORNER KIDS

Make a Flower from Tab Dividers!

My name: _____ Date: _____

PROJECT 1 — INSTRUCTIONS (keep this sheet!)

Tab dividers

Scissors

Glue

Green paper

Clay (center)

Pencil

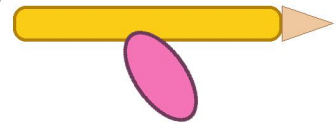

1 ☐ Trace & cut your petals

Use the TEMPLATE SHEET (Project 1B) to trace petals on your tab dividers — or draw your own. Cut out 6 to 8 petals. Mix colors!

2 ☐ Curl every petal

Roll each petal gently around a pencil for 3 seconds. This makes the petals bend like real flower petals.

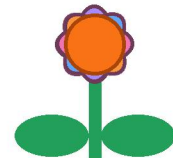

3 ☐ Glue them in a circle

Glue the petals in a ring, pointy ends facing out. Overlap them a little so there are no gaps.

4 ☐ Add the center, stem & leaves

Roll a small clay ball and press it into the middle. Cut a stem and leaves from green paper (templates on sheet 1B) and glue them behind the flower.

How fun was it? Color the stars!
