TRICHARGE PRO

3-in-1 25W Qi2.2 Magnetic Wireless Charger

Quick-start guide — what you get, what you need, how it works. Read this before you buy:

WHAT'S IN THE BOX

- ✔ TriCharge Pro charger (Silver or Orange)
- ✔ USB-C cable — 28 in (about 70 cm)
- ✖ Wall adapter — NOT included (see below)

That is everything. No manual in the box — this guide is the manual.

WHAT YOU NEED: A 45W+ ADAPTER

Full 25W fast charging needs a USB-C PD wall adapter rated 45W or higher (a laptop-class USB-C brick works great).

A weaker adapter still charges — just slower, and the charger may pause and resume. That is the adapter's limit, not a defect.

WHAT IT CHARGES

iPhone 12–18 (MagSafe snap-on)	**up to 25W**
AirPods / AirPods Pro (base pad)	**up to 5W**
Apple Watch — all models (rear puck)	**up to 2.5W**

✖ Apple Watch only — Galaxy Watch and Pixel Watch do not charge on it.

SET UP IN UNDER A MINUTE

1. Plug the included cable into the charger and your 45W+ adapter.
2. Unfold: phone pad in front, AirPods on the base, flip out the watch puck.
3. Snap your devices on — 16 N52 magnets align the phone for you.

GOOD TO KNOW

Folds flat to pocket size — built for travel and tidy desks.

Watch and AirPods pads are gentle by design (overnight-speed), the phone pad is the fast one.
